## **DETAILED ACTION**

### ***Reissue Applications***

The original patent, or a statement as to loss or inaccessibility of the original patent, must be received before this reissue application can be allowed. See 37 CFR 1.178.

### ***Claim Rejections - 35 USC § 112***

Claims 20 and 21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Do the first and the second serpentine circumferential bands, claimed in claims 20 and 21, are the same as the one claimed in claim 16? If yes, please insert the proper antecedent basis for the above limitations.

In claims 20 and 21, do the longitudinal connectors that extend between peaks of the bands is the same as the longitudinal connectors that extend between troughs of the bands? Correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 16-23 and 25-37 are rejected under 35 U.S.C. 102(e) as being anticipated by  
Berry et al US Patent 6,231,598 B1.

Art Unit: 3738

Berry et al discloses a stent having serpentine circumferential bands connected one to the other, the bands include first serpentine circumferential bands (14) and second serpentine circumferential bands (21). The first and second bands are connected by a plurality of longitudinal connectors (36).

Regarding claim 18, see Figure 5 showing the different thickness.

Regarding claim 23, the first length is structure element 15 (see Fig. 1); the second length is structure element 36.

Regarding claim 25, the first band is structure 21 and the second band is structure 14.

Regarding claim 31 and 32, see Figure 3.

#### ***Allowable Subject Matter***

Claims 1-15 are allowed.

Claim 24 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
